# Antonaros Theodoros

antonarostheodor@gmail.com — +30 6937091665 — website — linkedin — github

**EDUCATION**

*M.Eng. Electrical and Computer Engineering*, Aristotle University of Thessaloniki, Specialization area of Electronic & Computer Engineering, 2013-2020.
**Grade:** 7.05/10
**Thesis:** Deep Learning Architectures using Convolutional Neural Networks for Magnetic Resonance Image Segmentation.

**TECHNOLOGY SKILLS**

**Programming Languages:** Java, JavaScript, Python, SQL, C, C++.
**Technologies and Frameworks:** Neural Networks (Keras + TensorFlow), AWS, Spring Boot, Quarkus, Vue, React, Docker, Kubernetes, Prometheus, Fluentd, Grafana, ArgoCD.

**EXPERIENCE & PROJECTS**

*Associate, Software Engineer*        *June 2021 - Sep 2022*
**Pfizer**
- Designed, developed, tested, deployed, maintained and improved software.
- Managed individual priorities, deadlines and deliverables.
- Focused on overall quality and user experience.
- Provided technical expertise throughout the product life cycle, including design, implementation, and delivery of scalable services and infrastructure.

*Software Engineer, DevOps*        *Sep 2022 -*
**Deutsche Telekom**
- Designed, developed, and maintained cloud-native backend microservices and microUIs.
- Implemented CI/CD pipelines to automate software deployment and updates.
- Managed containerized applications using Docker and Kubernetes.
- Monitored infrastructure for performance optimization and cost-effectiveness.
- Advocated for and implemented best practices in coding, testing, and deployment.

*Thesis*        *November 2019 - February 2020*
**Aristotle University of Thessaloniki**
- Design and implementation of neural network architectures for knee MRI segmantation.

**Certifications**

**OTHER**

**Languages:** Greek(Native), English(C2).
**Interests:** Technology, Artificial Intelligence, Machine Learning, Computer Vision, Cloud Computing, Agile, Scrum, Software, Cloud Native.
